

Android Email Setup w/K-9 Client

*note before following these instructions, you must first download K-9 mail client from the android market.

Step 1. Insert your New Hope email address and password in the space provided, then select manual setup

user@nehp.net

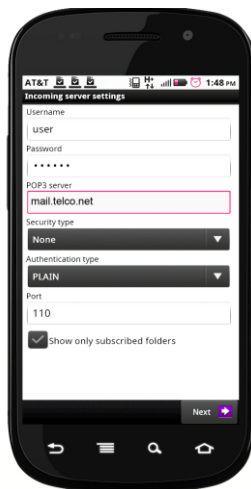

Step 2 Select IMAP

Step 3. The information for Incoming server settings should be automatically filled in. Select 'Next'

Username - user@nehp.net
POP3 server – mail.nehp.net
Port - 143

Step 4. The outgoing server settings should be correct as well. The only change necessary will be the authentication type. Select 'LOGIN' from the drop down. Then, Select 'Next'

SMTP server – mail.nehp.net
Username – user@nehp.net

Step 5. Select Done. Your New Hope email account has been successfully setup. Your inbox folders will now begin downloading!
