

iPhone Email Client Setup

Step 1. When opening the mail application for the first time you should be greeted by the screen below. Select 'Other'. Then, enter the information you received when signing up for email.

Address – user@nehp.net

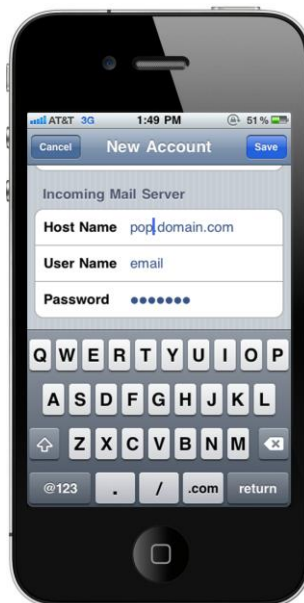

Select next.

Step 2. You will be prompted to select pop or imap. Select imap. Enter the host name for the incoming and outgoing with the information pictured below. Instead of 'tech' enter your username.

Host Name – mail.nehp.net

User Name – user@nehp.net

Step 3. If the following message appears, select 'Yes' , then select 'Continue' as we do not require SSL. If there is another error concerning verifying identity, select 'Continue'

Step 4. Select 'Save' and you are finished. Your New Hope email account has been setup successfully!
