What is WatchTVEverywhere?

WatchTVEverywhere has a lot of different definitions. For us, it is TV programs that are available on something other than a TV set. That means your PC, laptop, iPad, iPhone or Android.

How much does it cost?

Nothing. At this time, there is no extra cost for WatchTVEverywhere so feel free to explore. There is nothing available at this site that will result in an extra cost to you (except overage charges from your cellular carrier). You only need to be a subscriber to the TV network. This may change over time depending on the requirements made by the individual TV networks.

Where can I WatchTVEverywhere?

The answer is just about Everywhere. WatchTVEverywhere works anywhere you can receive an Internet signal: inside your house, at the office, shopping mall, hotel, airport, vacation home, etc. Wired connections and in-home WiFi will provide the best quality. The quality of WatchTVEverywhere signals while roaming (airports, stores, etc.) will vary depending on the strength of the signal. Be extra careful when you travel, especially outside the US. Data roaming charges may apply to networks that allow access outside the US and they can be very expensive.

What programs are available?

Different networks make different programs available at different times. Each TV network makes their own decision about what to make available on WatchTVEverywhere. For example, the live feed of CNN is available. However, the live feed of Nickelodeon is not. Instead, Nickelodeon offers full episodes of their popular programs.

Why aren't all programs available?

A TV network doesn't necessarily own all of the rights to all of the programs they transmit. A TV network may have the right to transmit a movie, but only to TV sets, not on WatchTVEverywhere. So, once again, it depends on the TV network.

Will other networks become available?

Yes. We are working with many different program providers to expand the number of networks and the number of programs available on WatchTVEverywhere. Registered users are presented with a complete list of all the networks available to them. You will see them automatically when they are added.
