

Automatic Recall

No more dashing to the door when you hear the phone ring.

— Auto Recall lets you take your time because with the press of a button you can call back the last number to ring your line.

To “turn on” the service:

1. Lift the handset and listen for the dial tone.
2. If you were already on the phone and ignored the call waiting tone, press and quickly release the “**switchhook**”.
3. Press ***69** to activate. A recorded voice will give you the phone number of the call you missed and ask if you want to use the Call Return feature. Just follow the voice instructions.
