

Selective Caller Rejection

You can program your phone to reject calls from any number you place in the rejection list. When your service is turned on, any callers in this list will hear an announcement that you're not accepting calls at this time. All other calls will ring through as usual.

To Program Your Phone:

1. Lift the handset and press ***60**.
2. Listen for an announcement telling you whether the feature is currently on or off. The recorded voice will then tell you how many (if any) numbers are currently stored in your rejection list. Follow the voice command in this menu to add numbers, to remove numbers, or to hear the numbers on your list.

NOTE: This feature allows you to block up to 30 numbers.
